DANIEL BEDRACK

AI & Automation Developer | Technical Project Manager

CONTACT 053-5215787 danielbedrack@gmail.com linkedin.com/in/danielbedrack github.com/DanielBedrack

PROFESSIONAL PROFILE

AI solutions and automation developer with experience delivering approximately 20 client projects from discovery through rollout. Builds end-to-end workflows across Make.com, n8n, monday.com, Fireberry CRM, APIs and AI tools, combining hands-on development with technical project management. Strong at translating business processes into reliable systems that reduce manual work and improve operational visibility.

PROFESSIONAL EXPERIENCE

Optimate

March 2025 - September 2026

Automation Developer and Technical Project Manager

- Lead approximately 20 client projects from requirements gathering and technical specification through development, testing, deployment, training and ongoing support.
- Design and maintain automation and AI solutions using Make.com, n8n, monday.com, Fireberry CRM, Google Workspace, REST APIs, webhooks, JavaScript, Python, SQL and JSON.
- Built an AI-assisted Gmail-to-monday.com workflow that identifies and classifies financial documents from recognized suppliers and customers, creates structured records and substantially reduces manual processing.
- Developed a WhatsApp service bot with ManyChat and n8n that answers routine questions, collects relevant details and routes cases requiring human assistance into a representative callback process.
- Implemented an end-to-end payment workflow integrating monday.com, Morning and Make.com for invoices, receipts, payment requests, approvals, status tracking, reminders, document storage and reconciliation.

Tesla

February 2024 - March 2025

Delivery Advisor

- Managed the vehicle delivery process from purchase confirmation through final handover, coordinating customer documentation and case progress in Tesla's CRM while resolving issues with sales, logistics, service and operations teams.

Sela College

March 2023 - February 2024

Coding Support and Assignment Reviewer

- Supported software development students, explained technical concepts, reviewed assignments and guided learners toward independent problem-solving.
